gres fine porcellanato

Esplorare gli spazi e scoprire che il vero fascino vive nella semplicità dei dettagli. Explorer arricchisce gli ambienti con composizioni dal minimalismo attuale, dove la materia ceramica è protagonista del design di interni. Realizzata in gres porcellanato a massa colorata, Explorer è disponibile in tre formati e cinque colori. La linea, arricchita da pezzi speciali e decori a mosaico, è pensata per offrire al progettista un'inedita libertà creativa.

Il gres fine porcellanato a massa colorata rappresenta la più avanzata espressione qualitativa dei prodotti ceramici per pavimenti. Viene ottenuto attraverso la miscelazione di argille pregiate, di feldspati, quarzi ed altre sostanze naturali raffinate ed omogeneizzate attraverso atomizzazione. L'alta qualità delle materie prime, la forgiatura mediante presse da 4200 tonnellate e la cottura ad elevatissima temperatura consentono di ottenere lastre di eccezionale resistenza e compattezza, idonee agli impieghi più severi.

Exploring spaces and discovering that the true appeal lies in simple details. Explorer enhances rooms with minimalist compositions having a modern touch, where ceramic plays a major role in interior design. Made from mass-coloured porcelain stoneware, Explorer is available in three formats and five colours. The range, which includes special pieces and mosaic designs, is created to offer designers unprecedented creative freedom.

Mass-coloured fine porcelain stoneware represents the most advanced expression of the quality of ceramic products for floorings. It is created by mixing fine clays, feldspars, quartzes and other natural substances that are refined and mixed through spray drying. The high quality of the raw materials, moulding with 4200-tonne presses and firing at very high temperatures produce extremely resistant and compact slabs suitable for heavy-duty applications.
