I prodotti delle collezioni CENTURY presentano variazioni di colori e venature della superficie tali da rendere ogni lastra diversa dalle altre, creando effetti di stonalizzazione tipici dei materiali naturali. È pertanto indispensabile, all'atto della posa, prelevare il materiale da più confezioni e posare armonizzando i pezzi per valorizzarne la stonalizzazione, che è da considerare caratteristica del prodotto.

Products from the CENTURY collections present colour variations and surface veining that make every slab unique, creating colour clashes typical of natural materials. This makes it indispensable to take pieces out of different packages when installing and to lay them in a harmonious composition that enhances their contrasting colours, a characteristic quality of the product.

Les produits des collections CENTURY révèlent des variations de couleurs et des veines en surface telles que chaque dalle semble être différente des autres, créant ainsi des divergences de nuance typiques des matériaux naturels. Lors de la pose, il est, par conséquent, indispensable de prélever le matériau de plusieurs caisses et de l'étaler en harmonisant les éléments pour souligner les variations de couleurs, qui doivent être considérées comme une caractéristique du produit.

Die Produkte der Kollektionen CENTURY zeichnen sich durch Variationen in der Farbgebung und Aderungen aus, so dass jede Platte einzigartig ist und die typischen Abtönungen des Natursteins zeigt. Es ist deshalb beim Verlegen unabdinglich das Material aus verschiedenen Packungen zu entnehmen und die einzelnen Fliesen der Abtönung nach harmonisch zu verlegen, um dieses typische Produktmerkmal voll hervorzuheben.

Los productos de las colecciones CENTURY presentan maticos y vetas superficiales que hacen que cada baldosa sea distinta de las demás, creando variaciones cromáticas típicas de los materiales naturales. Cabe, pues, efectuar la colocación sacando el material de varias cajas y disponer las piezas armonizándolas para hacer resaltar sus variaciones cromáticas, que deberán considerarse características del producto.
