## PRODOTTI E PROGETTI AL SERVIZIO DELL'AMBIENTE

Il Gruppo Fincibec persegue da anni un'attenta e continua politica di ecologia industriale. L'intero ciclo produttivo offre particolari garanzie di salvaguardia dell'ambiente. Tutti i prodotti Fincibec sono realizzati utilizzando materie prime a basso impatto ambientale e richiedono limitati consumi di risorse naturali quali acqua e gas metano; in particolare l'energia elettrica utilizzata è autoprodotta attraverso il sistema della cogenerazione che riduce drasticamente le emissioni in atmosfera. Tutti gli scarti di lavorazione vengono riutilizzati nel ciclo produttivo. Tutti i rifiuti derivati da attività estranee alla produzione vengono accuratamente raccolti in modo differenziato, riciclati e smaltiti. Ogni fase della realizzazione del prodotto (estrazione delle materie prime, preparazione degli smalti, smaltatura, cottura, scelta ed imballaggio) tiene in considerazione il rigoroso rispetto dell'ambiente e dell'uomo attraverso una analisi rivolta all'intero ciclo di vita del prodotto. Il fatto che per il Gruppo Fincibec il rappresentare un modello di ecosostenibilità industriale costituisca una priorità assoluta è anche testimoniato dalle certificazioni di parte terza che ha ottenuto: Certificazione ANAB-ICEA e Certificazione BUREAU VERITAS.

## PRODUCTS AND PROJECTS SERVING ENVIRONMENT

The Fincibec Group has been pursuing a careful and continuous industrial ecology policy for years. The whole manufacturing cycle offers special guarantees for environmental protection. All Fincibec products are manufactured using low environmental impact raw materials and a limited amount of natural resources such as water and natural gas; in particular, the electricity used is self produced through a cogeneration system which drastically cuts emissions into the atmosphere. All manufacturing scraps are re-used in the productive cycle. All wastes from activities not included in the production are carefully and separately collected, recycled and disposed of. Each step of the product manufacturing (raw material extraction, glaze preparation, glazing, firing, sorting and packaging) strictly pays attention to respecting environment and man through an analysis of the whole product life cycle. Representing a model of industrial eco-sustainability is an absolute priority for the Fincibec Group, as the obtained certifications by third parties also prove: ANAB-ICEA and BUREAU VERITAS certification.

BUREAU VERITAS ha certificato, in accordo con i requisiti ISO 14021, che 22 collezioni prodotte dal gruppo Fincibec per tutti e tre i propri brand Monocibec, Century e Naxos, contengono al loro interno una quantità di materiale riciclato superiore al 40%, garantendo agli architetti/progettisti che le utilizzeranno il raggiungimento di importanti crediti relativi al sistema di rating di valutazione eco energetica degli edifici LEED, quali:

BUREAU VERITAS has certified, in compliance with the requirements by ISO 14021, that 22 collections produced by the Fincibec group for all its three brands Monocibec, Century and Naxos feature a percentage content of recycled material over 40%; therefore, architects/designers using them will surely achieve important credits in the rating system of the building eco-energetic assessment LEED, such as:

Contribuisce al raggiungimento dei seguenti crediti Leed:

It helps to obtain the following Leed credits:

CREDITO MR 4.2 - Materiale riciclato UNI EN ISO 14021:2002 / Recycled content

CREDITO SS 7.1-7.2 - No effetto isola di calore / Heat island effect

CREDITO EA 1 - Performance energetica / Optimize energy performance

CREDITO IEQ 4.2 - Contenuto di VOC / Low emitting materials

CREDITO MR 1.2 - Riutilizzo di edifici / Building reuse

CREDITO MR 2.1-2.2 - Gestione dei rifiuti da costruzione /Construction waste management

CREDITO MR 5.1-5.2 - Materiali regionali / Regional materials

CREDITO ID 1 - Innovation in design

Come certificato da Bureau Veritas, Naxos dà concretezza al suo impegno ad abbattere le emissioni di CO2 finanziando progetti di riforestazione in paesi sottosviluppati. In questo modo Fincibec Group ottiene non solo il risultato di ridurre l'impatto ambientale del proprio processo produttivo, ma anche quello di sostenere economie e popolazioni bisognose di sostegno.

As certified by Bureau Veritas, Naxos fulfills its engagement to reduce CO2 emissions financing re-forestation projects in under-developed countries. In this way, Fincibec Group achieves not only the result of reducing the environmental impact of its productive process but also of supporting economies and populations needing support.

La Certificazione ANAB-ICEA, in accordo con i requisiti della norma EN ISO 14024, attesta che i prodotti Naxos sono materiali per la Bioedilizia e quindi: sono ottenuti da materie prime naturali estratte con un ridotto impatto ambientale, sono realizzati con processi e tecnologie che consentono una riduzione del consumo energetico nonché delle emissioni di inquinanti in atmosfera e in acqua, non emettono radiazioni pericolose, non rilasciano sostanze pericolose note o sospette di causare malattie, disagio umano e discomfort nei fruitori degli ambienti costruiti.

The ANAB-ICEA certification, in conformity with the requirements of the norm EN ISO 14024, certifies that the Naxos products are materials for bio-building and thus: they are obtained from natural raw materials extracted with a reduced environmental impact; they are produced with processes and technologies reducing energy consumption and the emission of pollutants in atmosphere and in water, do not release harmful radiation, they do not release harmful substances known or suspected to cause diseases, trouble and discomfort to the users of the built premises.

Naxos è socio del Green Building Council Italia. (Link ad attestato socio GBC).

Naxos is a member of Green Building Council Italia. (Link to GBC membership certificate).

Tutti gli stabilimenti produttivi del gruppo Fincibec sono dotati di impianti in grado di sfruttare l'innovativa tecnologia di decorazione digitale senza contatto. Naxos è dotata di impianti in grado di sfruttare l'innovativa tecnologia di decorazione digitale senza contatto.

All productive factories of the FINCIBEC group are equipped with systems able to use the innovative digital decoration technology without contact. Naxos is equipped with systems able to use the innovative digital decoration technology without contact.

Il logo MADE IN ITALY testimonia una precisa indicazione geografica di provenienza ed un modo di fare impresa legato ad i più alti valori etici e culturali.

The MADE IN ITALY logo witnesses a specific geographical origin indication and a way of making industry linked with the highest ethical and cultural values.
